Jeremie

Full-Stack Developer & IT Student

jeremiecaspillo16@gmail.com github.com/Jem4y Philippines

SUMMARY

IT student and full-stack developer who builds fast, accessible web applications end to end — from database schema and REST APIs to responsive interfaces. Comfortable on Linux, with a focus on clean, maintainable code and clear error handling.

SKILLS

Frontend: HTML5, CSS3, JavaScript, React, EJS, responsive design, accessibility
Backend: Node.js, Express, REST APIs, MySQL, authentication, sessions
Tooling: Git, GitHub, Linux, VS Code, npm, Postman

EXPERIENCE

Freelance Web Developer

2025 — Present

Self-employed · Remote

Design and build small business sites and internal tools, handling requirements, implementation, deployment, and handoff.

IT Support Intern

2024 — 2025

University IT Office

Diagnosed hardware and network issues, documented fixes, and automated repetitive setup tasks with shell scripts.

PROJECTS

BuildIT — PC Builder Store

Node.js · Express · MySQL

E-commerce flow with catalog, cart, session auth, admin dashboard, and OTP-verified checkout.

WiFi Audit CLI

Python · Linux

Defensive CLI that grades nearby access points on encryption, WPS, ciphers, and 802.11w support.

Notes API

Express · JWT · MySQL

REST API with JWT auth, rate limiting, and OpenAPI documentation.

EDUCATION

BS Information Technology

2022 — Present

University

Coursework in data structures, databases, networking, and software engineering.
